ANALYTICS CERTIFICATE

Stand out online. Discover the power of analytics and explore practical ways to use data to improve organisational efficiency and competitiveness.

This certificate covers the fundamental principles and approaches to conducting analytics tasks and determining sentiment, through to more advanced data analytics training in predictive techniques.

Developed by leading industry practitioners and derived from our sister-association IAPA's four base data analytics courses, ADMA IQ's Analytics Certificate provides a sound base for anyone starting a career in analytics, or those wanting greater exposure to modern predictive techniques.

This course is designed for those who are curious in nature, enjoy problem-solving and prefer a self-learning, exploratory approach to knowledge.

LEARN TO:

- Use analytics principles and the lifecycle
- Understand analytical tools and techniques
- Define data visualisation and identify different examples
- Discover predictive analytics and predictive modelling techniques
- Evaluate model effectiveness

COURSE COVERS:

In this online course, we'll look at defining analytics and the lifecycle, tools for analytics, delivering results and how to predict trends. Once we have thoroughly explored the fundamentals, we'll also look at data visualisation, developing a business case, data reduction, sample design and predictive modelling techniques.

This will all be broken down into the following online courses and modules:

Course 1: Analytics Fundamentals includes the following modules

- Defining Analytics
- Analytics Lifecycle
- Analytics Techniques
- Tools for Analytics I
- Tools for Analytics II
- Delivering Results
- Emerging Trends

Course 2: Data Visualisation includes the following modules

- Introduction to Data Visualisation
- Discovering Data Visualisation
- Storytelling with Data
- How to Present Data

ASSESSMENT:

1. In-module questions and activities
2. Final online exam

 Intermediate/Practitioner  Certificate

Duration: 6 months to complete

Course 3: Practical Predictive Analytics includes the following modules

- Introduction to Analytics
- Developing a Business Case
- Data Reduction
- Variable Exploration & Model Feasibility
- Sample Design
- Predictive Modelling Techniques
- Evaluating Model Effectiveness

Course 4: Sentiment Analysis includes the following modules

- What is Sentiment Analysis?
- Text Analysis
- Data Pre-processing
- Measuring Sentiment
- Predicting Sentiment

 Intermediate/Practitioner  Certificate

Duration: 6 months to complete

DATA-DRIVEN MARKETING CERTIFICATE

Master advanced data analysis. Learn how to leverage technology and data to drive actionable results to advance your work and your career.

Explore data-driven marketing and learn the skills to use it confidently. This certificate covers the complete marketing mix using data and what's relevant for both in-house and outsourced data roles and requirements.

You'll not only receive the practical knowledge from leading experts, but you'll obtain an industry-recognised data-driven marketing certification from ADMA IQ for your CV.

LEARN TO:

- Understand and utilise data-driven marketing to help achieve your business objectives
- Integrate data-driven marketing into your overall business and strategies
- Assess and apply various data sources to solve business problems

Data-driven Marketing Leadership

- Understand the current data-driven marketing landscape for both brands and consumers and the steps in creating an effective data-driven strategy
- Define customer centricity and its importance in achieving outstanding customer experience
- Identify the role and importance of data and feel confident with a technical part of marketing
- Become data-savvy, and easily talk to your data analysts/scientists with better understanding of the tasks they perform
- Make better business decisions, now that you understand the process behind the insights.
- Articulate complex procedures such as logistic regression and CHAID

Data-driven Marketing Practitioner

- Explore the fundamentals of data-driven marketing, ensuring you develop a solid understanding of the process
- Use data analysis to improve the efficiency and effectiveness of a marketing programme and learn the metrics to evaluate your marketing performance
- Look at the appropriateness of measures such as ROI and find new ways to overcome specific business challenges
- Investigate analytical tools and techniques, tell stories, solve problems and make good decisions
- Build a team of experts

Data-driven Marketing Strategy

- Assess the quality of data, gathering it from reputable sources and interpreting the results to drive actionable insights
- Select the appropriate data analysis technique in order to answer complex business problems
- Examine how to manage and engage with challenging stakeholders
- Talk to your data leaders and analysts with better understanding of the tasks they perform
- Talk about data, uncover insights and see how useful the insights can be with better understanding of the processes that drive the business decisions
- Articulate complex procedures to stakeholders and manage politics

WHO SHOULD DO THIS COURSE:

- Marketers and Brand Managers who have some experience with data and technology but want to grow their confidence
- Analysts who may have only one perspective of data, or be a specialist in one area of data and want to broaden their skill base
- Marketing and advertising professionals who are new to data and keen to learn how to leverage data across a broad spectrum of decision making
- Small and medium-sized businesses that are looking to learn more about data
- Sales managers who need to understand how data-driven marketing works

IN-CLASS COURSE COVERS:

Course 1: Data-driven Practitioner Course includes the following modules

- Module 1: Defining Data-driven Marketing
- Module 2: Typical Business Challenges
- Module 3: Analytical Techniques
- Module 4: The Importance of Testing
- Module 5: Metrics for Measuring Marketing Performance
- Module 6: How to Build a Team of Data Experts

Course 2: Data-driven Marketing Strategy Course includes the following modules

- Module 1: Data Quality, Data Gathering and Interpretation
- Module 2: Strategic Level Measurement
- Module 3: Business Advocacy
- Module 4: Stakeholder Engagement and Management
- Module 5: Strategic Development

Course 3: Data-driven Marketing Leadership Course includes the following modules

- Module 1: Business Operations & Governance
- Module 2: Data Team Leadership
- Module 3: Cross-functional management & integration
- Module 4: Operational management

ASSESSMENT:

Assessment: Individual Presentation on day 4

 Advanced/Senior Leader  Certificate

Duration: 3.5 days, 1 per fortnight over 7 weeks

TESTIMONIALS

The instructor had a great demeanour and very proactive. It was interesting to learn about how to overcome business problems using the intelligence of data.

- Joshua McLean, Senior Marketing Manager, AusPost

Insightful, engaging and provided a great foundation for me to start harnessing the value of data to a Marketer.

- Mrgan Peterson, Marketing Consultant, CCI

The Data-driven Marketing Certificate delivered the skills I require to write a Data Strategy. I can take the key components I've learnt and apply this to my business objectives going forward.

- Alison Diaper, Head of B2B and Partnership Marketing, World Nomads Group

The Data-driven Marketing Certificate gave a true insight into how to directly use data in marketing strategies – I really liked how it was broken down into three elements and I learnt heaps from the course to then implement in my day to day job as Marketing Manager.

- Kyra Currie, Marketing Manager, AusPost

IN-CLASS PRICE

Member: \$2,100

Non-member: \$2,845

In-class course available in Sydney and Melbourne.

See page 27 for course dates.

In-house course available.

Want to transform your work and career? Learn how to leverage technology and data to drive real results with an industry-recognised digital marketing certification.

In this digital marketing certificate, you'll explore every facet of digital marketing and learn the skills to apply it with confidence. Whether you're client-side or agency, you'll complete the course having an in-depth understanding of the digital landscape, where it sits within the broader marketing mix, and what you need to do to achieve your business objectives.

You'll not only receive the practical knowledge from leading experts, but you'll obtain an industry-recognised digital marketing certification from ADMA IQ for your CV.

LEARN TO:

- Leverage the power of digital marketing and apply it to your business objectives
- Understand the broader digital landscape and strategic planning, as well as how to directly apply that knowledge through campaign planning and management and all the do's and don'ts of compliance. Assess and apply various digital channels to solve a problem
- Assess and apply the different digital channels to solve your business problems

IN-CLASS COURSE COVERS:

Through discussions, presentations and theoretical exercises in class, you'll become proficient in:

Digital Marketing Foundations

- Consumers - understand your audience, why the marketing landscape changes and how to transform insights from consumer behaviour into favourable returns
- Content - from content strategy to planning, creation and design for the brand, this topic deals with the history, purpose and constraints of the digital channels available
- Data - what is big data and how can we use it? The question will be answered by an examination of metrics, measurement and evaluation

Digital Marketing Channels

- Website - learn to design for usability, function and effectiveness
- Mobile and Email - aspects include email strategy, designing responsively, data management and the Spam Act for mobile sites and apps
- Social Media Marketing - looking at social media platforms and how they're used, we'll consider the benefits, the community management and the monitoring involved
- Digital Paid Media - explore the paid media landscape including targeting, data, technology, networks and search engines

Digital Marketing Campaign Planning & Management

- Project Management - master managing digital projects and creating budgets, dashboards and templates
- Applications - plan your campaigns for awareness, branding, acquisition and retention
- Optimisation & Emerging Trends - discover how to predict and utilise emerging trends, technology and media

To build on the knowledge you acquire, you will also receive access to five (5) modules of your choice (in-class certificate only).

You may wish to work with your instructor as the certificate progresses to determine which course is best for you.

ASSESSMENT IN-CLASS COURSE:

Assessment: Group presentation

Course 3: Digital Marketing Campaign Planning and Management includes the following modules

- Digital Marketing Management
- Campaign Planning
- Conversion and Optimisation

ASSESSMENT ONLINE COURSE:

1. In-module questions and activities
2. Final online exam

TESTIMONIALS

"I engaged with the Digital Marketing Certificate because of the amazing skills of the instructor Val. The course broke down a complex and ever-changing topic into easy-to-understand chunks. I would recommend it to anyone who is interested in marketing to achieve a tangible ROI."

- Ahmed Mahmoud, National Manager, Business Transformation,
Toyota Motor Corporation Australia

"I found the course the most practical I have ever completed. I was able to integrate learnings weekly into the MyHouse business. This ranged from improving UX on website to retargeting and Adwords."

- Tracey Hamilton, Head of Marketing and eCommerce, MyHouse

"The ADMA Digital Marketing Certificate course is definitely one not to miss. The 5-day intensive course is perfect for the busy marketer ready to brush up on their digital skills to keep up to date with the latest trends. The tutor and fellow classmates were so helpful which made the course just a little easier while helping you to prepare to take on future projects and tasks full force."

- Heather Tamson, National Marketing Coordinator, Rondo Building Services

CUSTOMER JOURNEY MAPPING

Put your customer at the heart of your business. Create a compelling customer experience using analytics and insights.

Effective digital marketing starts with understanding your customer needs, yet most strategies focus on the product. Learn how to use customer research, analytics and the different tools that will help you draw insights from data to create a compelling customer experience. We'll show you how to put the customer at the centre of your marketing, and how to unlock a deeper understanding of the journey they go through to engage with your category, brand and product.

LEARN TO:

- Identify and understand your key audience segments, develop a detailed customer journey for these segments and understand what key customer journeys drive your business
- Validate your journeys through research and data, and extend your customer journeys to become experience maps that include channel, content and functionality requirements
- Understand how your experience maps can then feed into channel plans, content plans and CRM strategies that are fundamentally customer centric

WHAT THE COURSE COVERS:

- How to deeply understand your customers and how they interact with your category and product
- A range of templates covering all aspects of the process:
- Templates and framework for customer segmentation and personas
- Template for a customer journey maps and experience maps
- Examples and case studies of customer journey mapping and subsequent business outcomes
- Interactive exercises throughout the day allowing you to develop the framework for your own customer journeys

DATA ANALYSIS

Get the data visualisation training you need and leverage the power of data to help you find, convert and keep customers.

Whether you're in planning, implementing or review mode, this data analysis course will open your mind to the extensive possibilities for enriching your marketing through analysis. Through hands-on practice, with a selection of powerful easy-to-use tools, you'll also discover that analysis is no longer reserved for specialists – any marketer with a reasonable grasp of numbers can do it!

LEARN TO:

- Assess data value and viability inside and outside your organisation
- Use data analysis to identify patterns and expose trends
- Analyse big data to drive sales and gain insight from customer data for marketing strategy and communication purposes
- Adopt effective data management and processing practices
- Access high performance analysis tools to tackle important marketing challenges

WHAT THE COURSE COVERS:

This is a highly 'hands-on' course. Bring your laptop and be prepared to do some analysis using some best-in-class tools and simulated customer datasets. Find out just how intuitive and accessible data analysis is. We'll cover:

- Preparing for analysis – goals, data sources, rules and processes
- Using choice modelling to answer positioning and creative questions
- Data visualisation for segmentation and customer journey mapping
- Social media monitoring – unravelling the buzz
- Web analytics – what are the most useful insights?
- Media attribution – how to boost media efficiency
- Learning by doing – pre-test planning and post-test review
- Predictive analytics – right product, right-time, right place

DATA VISUALISATION

Learn to translate data into insightful visual stories that influence decision makers.

Data is the foundation of the digital age. Discover how to use, translate, and present data in new and enticing ways.

You will draw upon data interpretation and convert these into commercial insights, learn data visualisation at an introductory level and advance your knowledge with tips and techniques to effectively present your data and conclusions to a variety of audiences – whether they are familiar with data visualisation or not.

LEARN TO:

- Define what data visualisation is and identify different examples of data visualisation you can use to enhance your business
- Identify analytics tools that can help you discover data, determine the types of variables in data visualisation
- Understand both how to make data memorable and the techniques involved in visual storytelling for your audience

WHAT THE COURSE COVERS:

You'll dissect business goals and the process behind the decision maker. Looking at visual perception design, discover how to select the most compelling and appropriate approach to deliver the analytics. Current and effective examples will be shown as guides to illustrate this.

DATA-DRIVEN MARKETING PRACTITIONER

You've mastered the basics of data analysis. Now, build on your skills to drive your business forward.

Become fluent in the language of data and achieve your business goals sooner. We'll show you how to access both primary and third-party data, develop actionable insight, explore data research and perform analytical techniques. You and your team will be able to tell stories with data, benchmark insights from analytics and incorporate the latest solutions and models to tackle business problems.

LEARN TO:

- Explore the fundamentals of data-driven marketing, ensuring you develop a solid understanding of the process
- Use data analysis to improve the efficiency and effectiveness of a marketing programme and learn the metrics to evaluate your marketing performance
- Look at the appropriateness of measures such as ROI and find new ways to overcome specific business challenges
- Investigate analytical tools and techniques, tell stories, solve problems and make good decisions
- Build a team of experts

WHAT THE COURSE COVERS:

Through interactive theoretical practices, you'll look at the appropriateness of measures such as ROI and find new ways to overcome specific business challenges. Relevant case studies will also be provided.

[Module 1:](#) Defining Data-driven Marketing

[Module 2:](#) Typical business challenges

[Module 3:](#) Analytical techniques - ways to remedy

[Module 4:](#) The importance of Testing

[Module 5:](#) Metrics for Measuring Marketing Performance

[Module 6:](#) How to build a team of data experts

DATA-DRIVEN MARKETING STRATEGY

Strategically put the customer at the centre of your marketing and use your data for better business.

Make the most of your valuable data with a strategic approach to marketing. We'll help you uncover insights about how customers interact with your brand and identify areas that would otherwise go undetected. Feel confident with this technical part of marketing and apply best practice in strategic level measurement.

LEARN TO:

- Assess the quality of data, gathering it from reputable sources and interpreting the results to drive actionable insights
- Select the appropriate data analysis technique in order to answer complex business problems
- Examine how to manage and engage with challenging stakeholders
- Talk to your data leaders and analysts with better understanding of the tasks they perform
- Talk about data, uncover insights and see how useful the insights can be with better understanding of the processes that drive the business decisions
- Articulate complex procedures to stakeholders and manage politics

WHAT THE COURSE COVERS:

- [Module 1:](#) Data Quality, Data Gathering and Interpretation
- [Module 2:](#) Strategic Level Measurement
- [Module 3:](#) Business Advocacy
- [Module 4:](#) Stakeholder Engagement and Management
- [Module 5:](#) Strategic Development

DIGITAL COPYWRITING ESSENTIALS

Write with impact. Master the basics of writing engaging copy for the web, landing pages, email, social and more.

Digital copywriting has one major challenge – the reader is in charge. Unlike traditional mediums, such as TV, radio or print, the reader can choose their own journey through the information.

As a writer, you need to understand how people read a screen, what they want, and how they go about hunting it down.

Join us for an informative, practical one day digital copywriting course as we explore the skills of writing for digital platforms. What gets an email opened? What are the most powerful five words for a landing page headline? How does the eye track on a website? How do you engage on social?

Always engaging and full of research-driven insights, this digital copywriting course is an essential step to help you create effective digital copy.

LEARN TO:

- Explore the foundations of good copy and how the rules transform for an online arena
- Develop and write engaging copy using proven processes and techniques
- Build your audience through writing compelling tailored for each of the major digital channels
- Understand the challenges and opportunities of writing for Google

WHAT THE COURSE COVERS:

- How to write effective, compelling copy no matter what the medium
- Understand the differences between traditional and digital mediums
- Learn how to write more effectively for the web and landing pages
- Learn the key elements of an email that gets it opened and read
- Understand what works best for social media

PRIVACY AND MARKETING COMPLIANCE

Know the law. Manage your data-driven marketing within the boundaries of privacy and compliance.

Connecting with your customer in the digital age can be tricky. In an online world it's easier than ever, but just because you can doesn't mean you should. Don't risk your brand's reputation by breaking the law.

In this course, learn to navigate the law like a pro. We'll help you to view the complex details of compliance through a straightforward commercial lens.

LEARN TO:

- Identify the legal and ethical boundaries for advertising content and promotional tactics
- Determine the privacy compliance status of your existing customer data and how to gather data in a privacy-compliant way
- Manage personal communications and avoid the Spam trap
- Assess your quality control and data security measures and control the sharing or disclosure of data with internal and external stakeholder
- Manage your content development in line with ethics, fair practice guidelines and copyright laws
- Consider laws affecting marketing such as promotions and competitions

WHAT THE COURSE COVERS:

- Clear and simple guidelines to help you avoid the real danger of breaking the law by using your customer data in the wrong way
- How to manage the risks of non-compliance in advertising, social media, blogs and website content

[Module 1:](#) Marketing & Advertising Content

[Module 2:](#) Competition & Prize Giveaways

[Module 3:](#) Intellectual Property: copyright & trade marks

[Module 4:](#) Privacy

RETENTION AND LOYALTY MARKETING STRATEGY

Stand out. Improve your customer experience and learn the art of retaining loyal customers.

Invest in your customers and they'll invest in you. But where do you start? This course has been developed by global loyalty education experts, The Loyalty Academy, and local loyalty experts, Ellipsis & Company. It offers the world's first formalised educational and training curriculum for customer loyalty professionals and marketers.

LEARN TO:

- Understand the principles, best practices and trends of retention and loyalty marketing to drive customer engagement
- Implement best practices and proven models for designing the core of any retention and loyalty marketing effort: the customer value proposition
- Incorporate soft-benefit recognition elements—special access, special privilege, unique experiences
- Understand the fundamentals of customer segmentation and loyalty analytics and the link between reward redemption and customer value
- Understand the key financial considerations in planning and managing a retention initiative such as a loyalty program

WHAT THE COURSE COVERS:

- Introduction to Loyalty Marketing and Current Loyalty Trends
- The Psychology of Customer Loyalty
- Creating a Customer Value Proposition
- Principles of Soft Benefit Design
- The Intersection of Loyalty and Engagement
- Introduction to Loyalty Analytics & Financial Modelling
- Loyalty for the Digital Consumer and The Mobile Loyalty Landscape

SENTIMENT ANALYSIS

Unlock the secrets of sentiment marketing and grow your business.

Like a digital litmus test, sentiment helps you to detect attitudes and predict intent. Sentiment marketing has become essential in the marketer's arsenal.

In this course, develop a deeper understanding of how to work with unstructured text data, such as social media, and learn how traditional machine learning and predictive analytics techniques can be used for the purposes of sentiment analysis. Discover best-practice approaches that use modern text-mining and predictive analytics techniques to gain insight into consumer opinions and forecast behaviours.

LEARN TO:

- Analyse unstructured text data, understand and effectively address common challenges in text analysis and reveal insights that aid business decision making
- Understand text-mining approaches, relationships between text-mining and predictive analytics, relevant commercial and open source tools, and the datasets most conducive for sentiment analysis will be examined
- Retrieve social media generated textual data from the web and apply best practice approaches to textual data pre-processing and enrichment techniques including normalisation, tokenisation, stemming, lexicons creating and usage
- Gain insight into using modern analytical techniques to derive sentiment from the data

WHAT THE COURSE COVERS:

- [Module 1: What is Sentiment Analysis?](#)
- [Module 2: Text Analysis](#)
- [Module 3: Data Pre-processing](#)
- [Module 4: Measuring Sentiment](#)

SOCIAL MEDIA MARKETING ESSENTIALS

Build campaigns that convert. Master the basics behind social media marketing and adopt winning practices.

Want to get up to speed with the latest trends, techniques and technologies in social media? Whether you're a B2B or B2C marketer, client-side or agency, this course will help you craft your own social media campaign, from strategic social media planning through to execution and optimisation.

LEARN TO:

- Plan social media and social media marketing tactics to achieve results
- Identify all the major social channels, tailor content appropriate to the channel, and engage the right consumer in the right space
- Measure and optimise your social media activity

WHAT THE COURSE COVERS:

In class we'll adopt a test-and-learn approach and discover how to use both free and paid tools for monitoring content, task scheduling and automation, as well as how to measure performance and what to do with those results. Alternatively, you can cover this content online, broken down into the following modules:

- [Module 1: The Social Media Landscape](#)
- [Module 2: Campaign Analysis](#)
- [Module 3: Campaign Planning](#)
- [Module 4: Content Creation](#)
- [Module 5: Content Distribution](#)
- [Module 6: Managing Campaigns](#)

SOCIAL MEDIA MARKETING STRATEGY

Level up your social media marketing. Research, plan and implement a successful strategy that sells.

Social media isn't just for catching up with friends – it's a way for consumers to engage and communicate with brands. But this doesn't mean businesses should just start a Facebook page or Twitter account. It's not that simple, as there are right and wrong strategies to use with each channel.

Looking at these channels and their tactics, you'll learn how to develop, implement and measure social media activity to achieve your business goals.

LEARN TO:

- Measure social media and run a social media audit to understand your social media activities
- Extract insights from social analytics to shape your social media strategy
- Create an integrated channel plan across Facebook, Twitter and more and effectively manage and optimise campaigns
- Set social media policies for your business

WHAT THE COURSE COVERS:

- Social auditing of content strategy, community management, tools, platform usage
- Social listening using a hands-on demo
- Extracting insights from social analytics
- Writing a publishing calendar and allocating budget for social ad spend
- Managing social media including measuring and optimising activity
- Identifying the tools you need for listening, content management and analytics
- Creating a social media policy for staff
- Organising community management
